

Antipsychotic-induced movement disorders: A multidisciplinary approach to recognition, screening, and management

September 16, 2021; 12:00 – 1:00 PM Zoom Meeting

There is no fee to participate in this program.

Target Audience

Physicians, resident physicians, advanced practitioners, NC Psychologists, counselors, social workers, direct care providers, pharmacists and referring providers.

Program Description

This activity will cover four main antipsychotic-induced movement disorders - dystonia, parkinsonism, akathisia, and tardive dyskinesia – with a focus on symptom recognition, screening tools, and management. We will also provide education about misuse of medications for antipsychotic-induced movement disorders, such as the use of anticholinergics (benztropine) for akathisia and tardive dyskinesia. Since psychiatric practice currently relies heavily on telemedicine as the primary mode of patient interaction, our program will give specific strategies for providers to use in patient assessment for these disorders when using videoconferencing.

Objectives

At the conclusion of this presentation, the participant should be able to:

- 1:** Outline an understanding of antipsychotic induced movement disorders (AIMD)
- 2:** Recognize presentation of AIMD and appropriately screen
- 3:** Discuss treatment strategies
- 4:** Identify resources to work collaboratively with other healthcare professionals
- 5:** Discuss approaches to educate patients, patients' advocates, colleagues

Speakers:

Phillip Bryce Jones, MD is a psychiatrist and internist working in Duke Health System. He received his medical degree from the University of Oklahoma in 2008. Bryce trained in Internal Medicine at University of Illinois and subsequently trained in Psychiatry at The University of North Carolina. His clinical work is focused in consult-liaison psychiatry and with patients with significant medical illness burden like transplant and cancer, in addition to working with learners at all levels of medical training.

Andrew Muzyk, PharmD, MHPE is an Associate Professor of the Practice of Medical Education at Duke University School of Medicine in Durham, NC and an Associate Professor in the Department of Pharmacy Practice at Campbell University College of Pharmacy and Health Sciences in Buies Creek, NC. Dr. Muzyk also holds a Clinical Associate appointment in the Duke University School of Nursing.
