

# Practice Transformation Framework: Past, Present and Future

# What is Practice Transformation?

- Practice Transformation refers to a process of change
- Designed to help provider agencies develop tools, skills, and knowledge necessary to shift to measurement-based care and to participate in alternative payment models
- A focused process and methodology that provides a framework to enable provider agencies to change their structure to enhance service delivery, i.e. team-based care, pre-visit planning

# Why Is Healthcare Shifting?

## Fee For Service

- Transactional
- Volume-based care
- Improvement is one Member at a time
- Views Member in a silo

## Value-Based Care

- Whole person integrated care
- Population Health management
- Outcomes focused
- Enhances clinical efficiency

# Fee-For-Service (FFS) vs. Value-based Payment (VBP)

Current State:  
FFS: Incentive for Volume

Future State:  
VBP – Incentive for Value

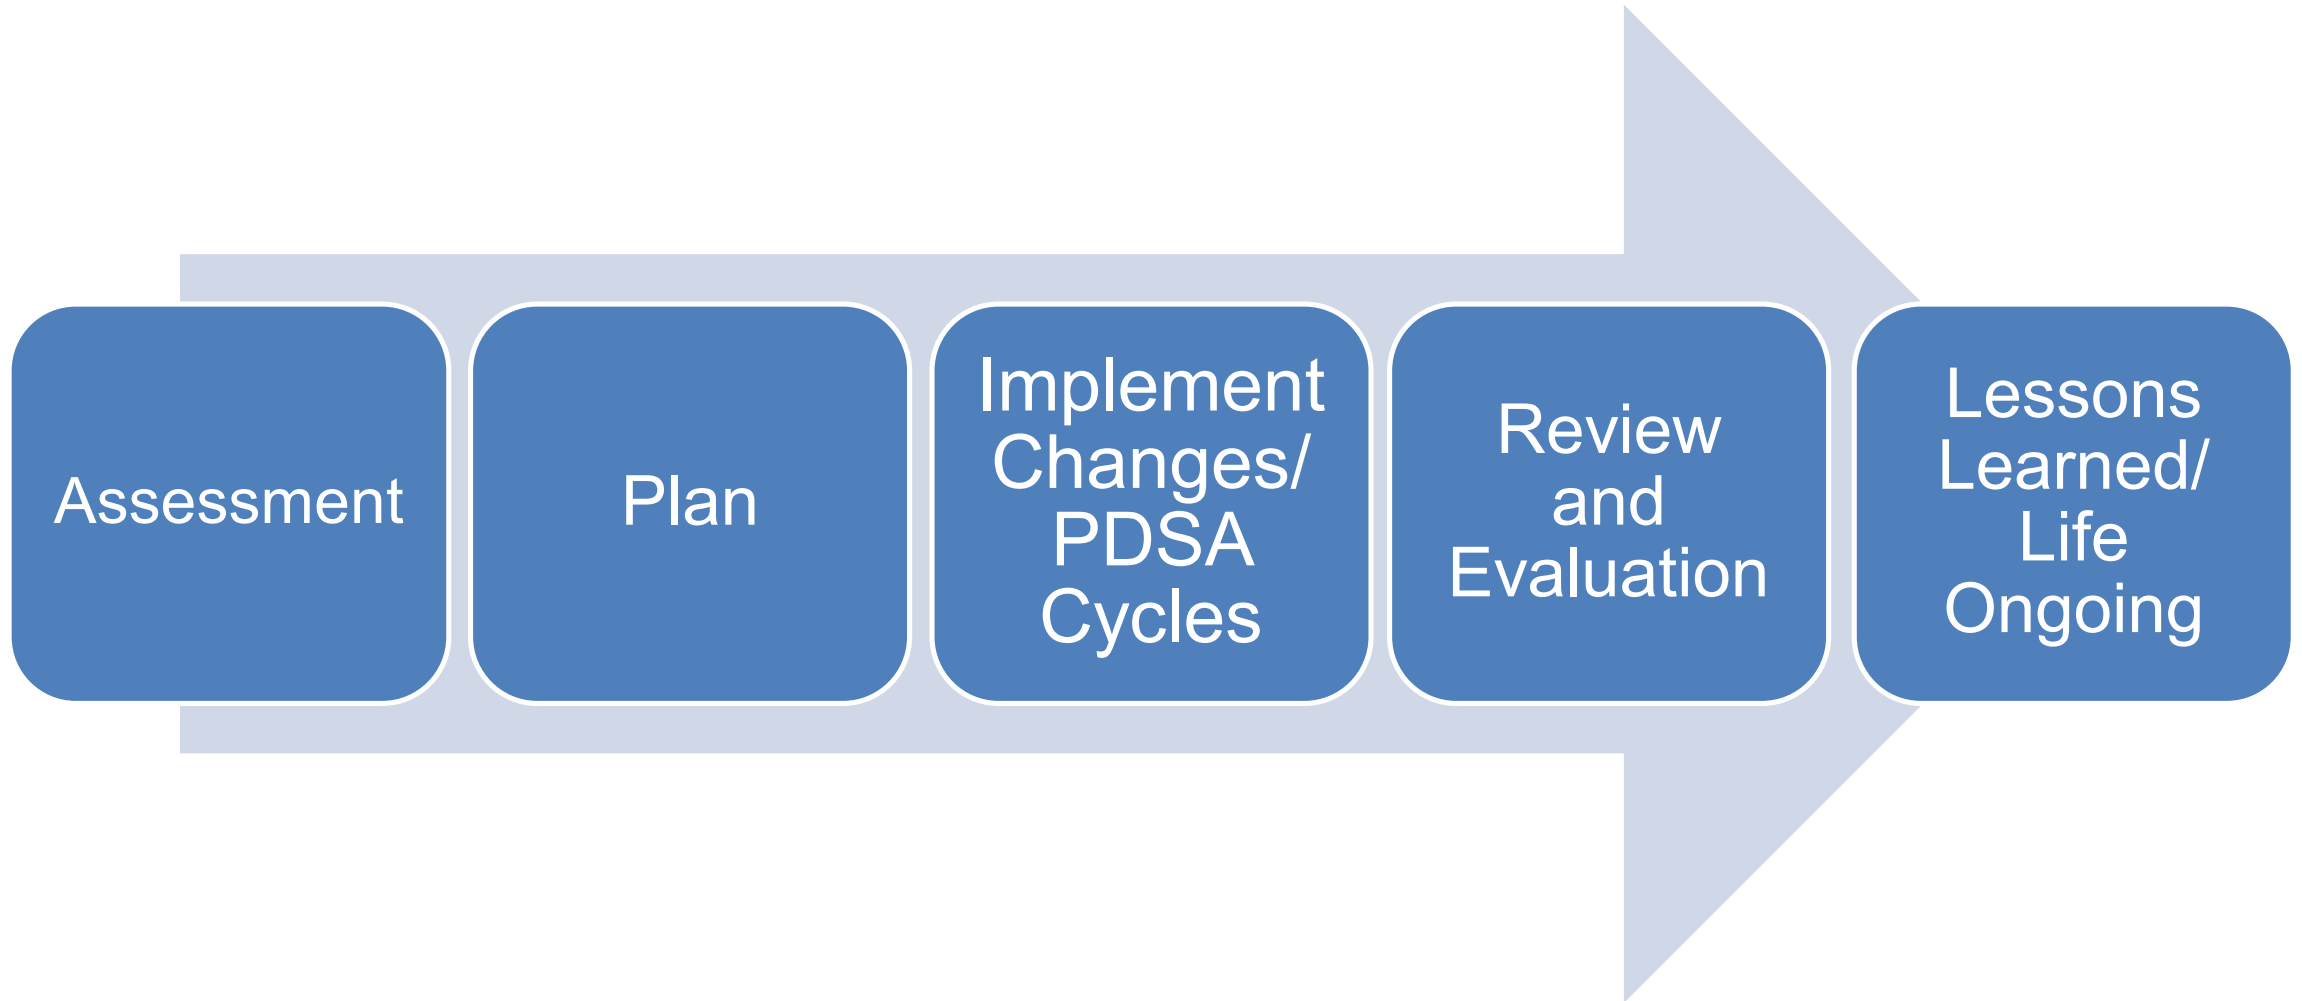

# How We Are Going to Transform

- Categorize providers
- Conduct gap analysis
- Make gap analysis recommendations
- Create transformation plan

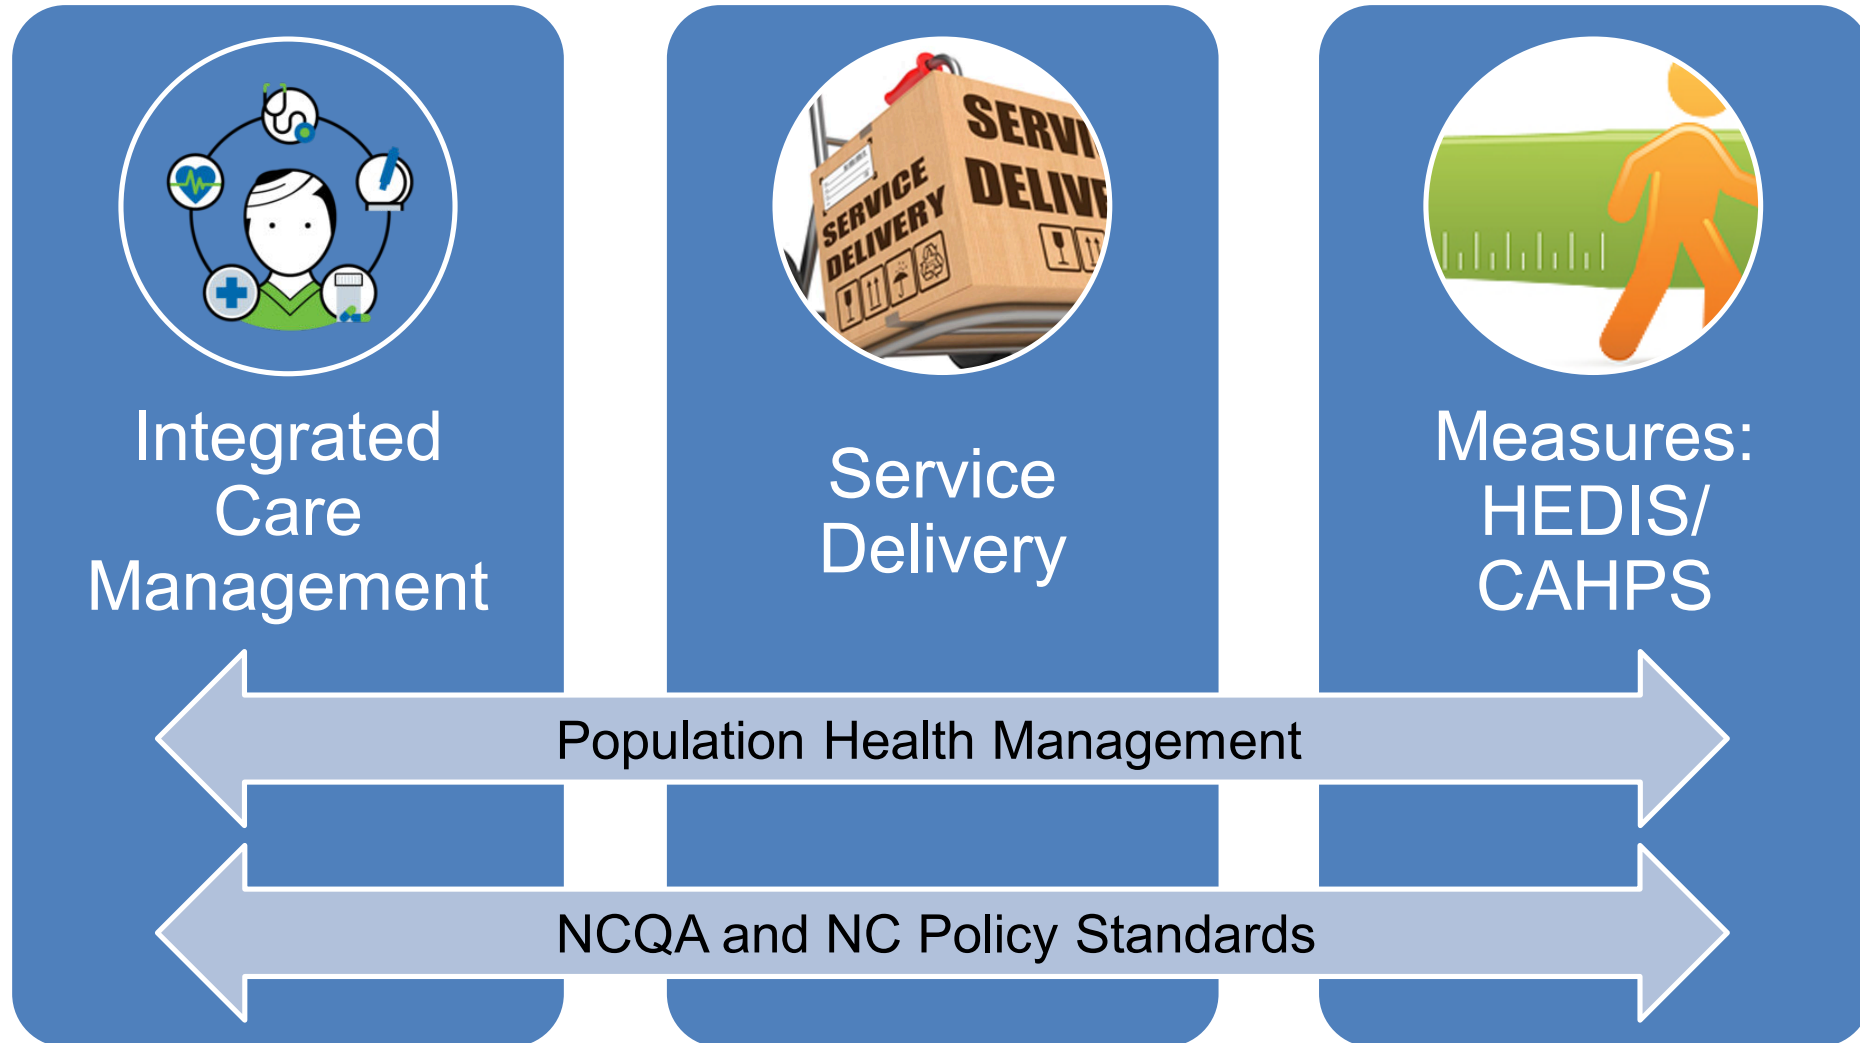

# How Alliance Enables Provider Transformation

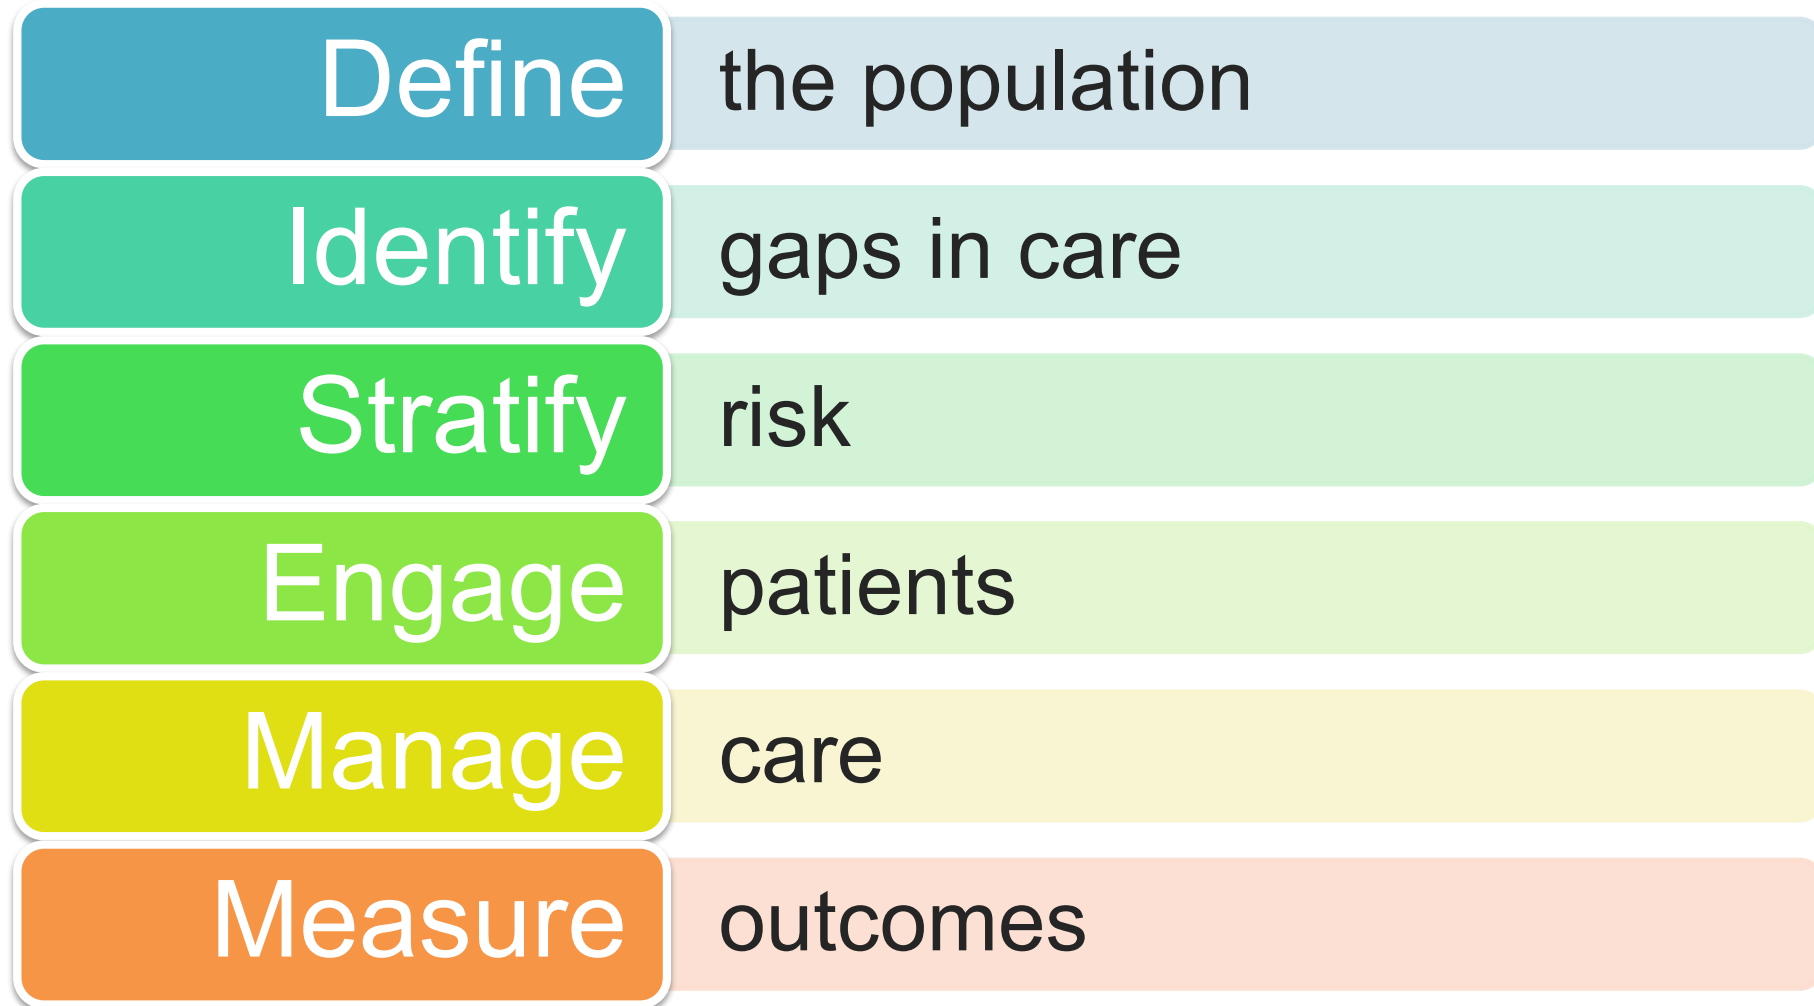

# Components of Practice Transformation

# Practice Transformation: Nuts and Bolts

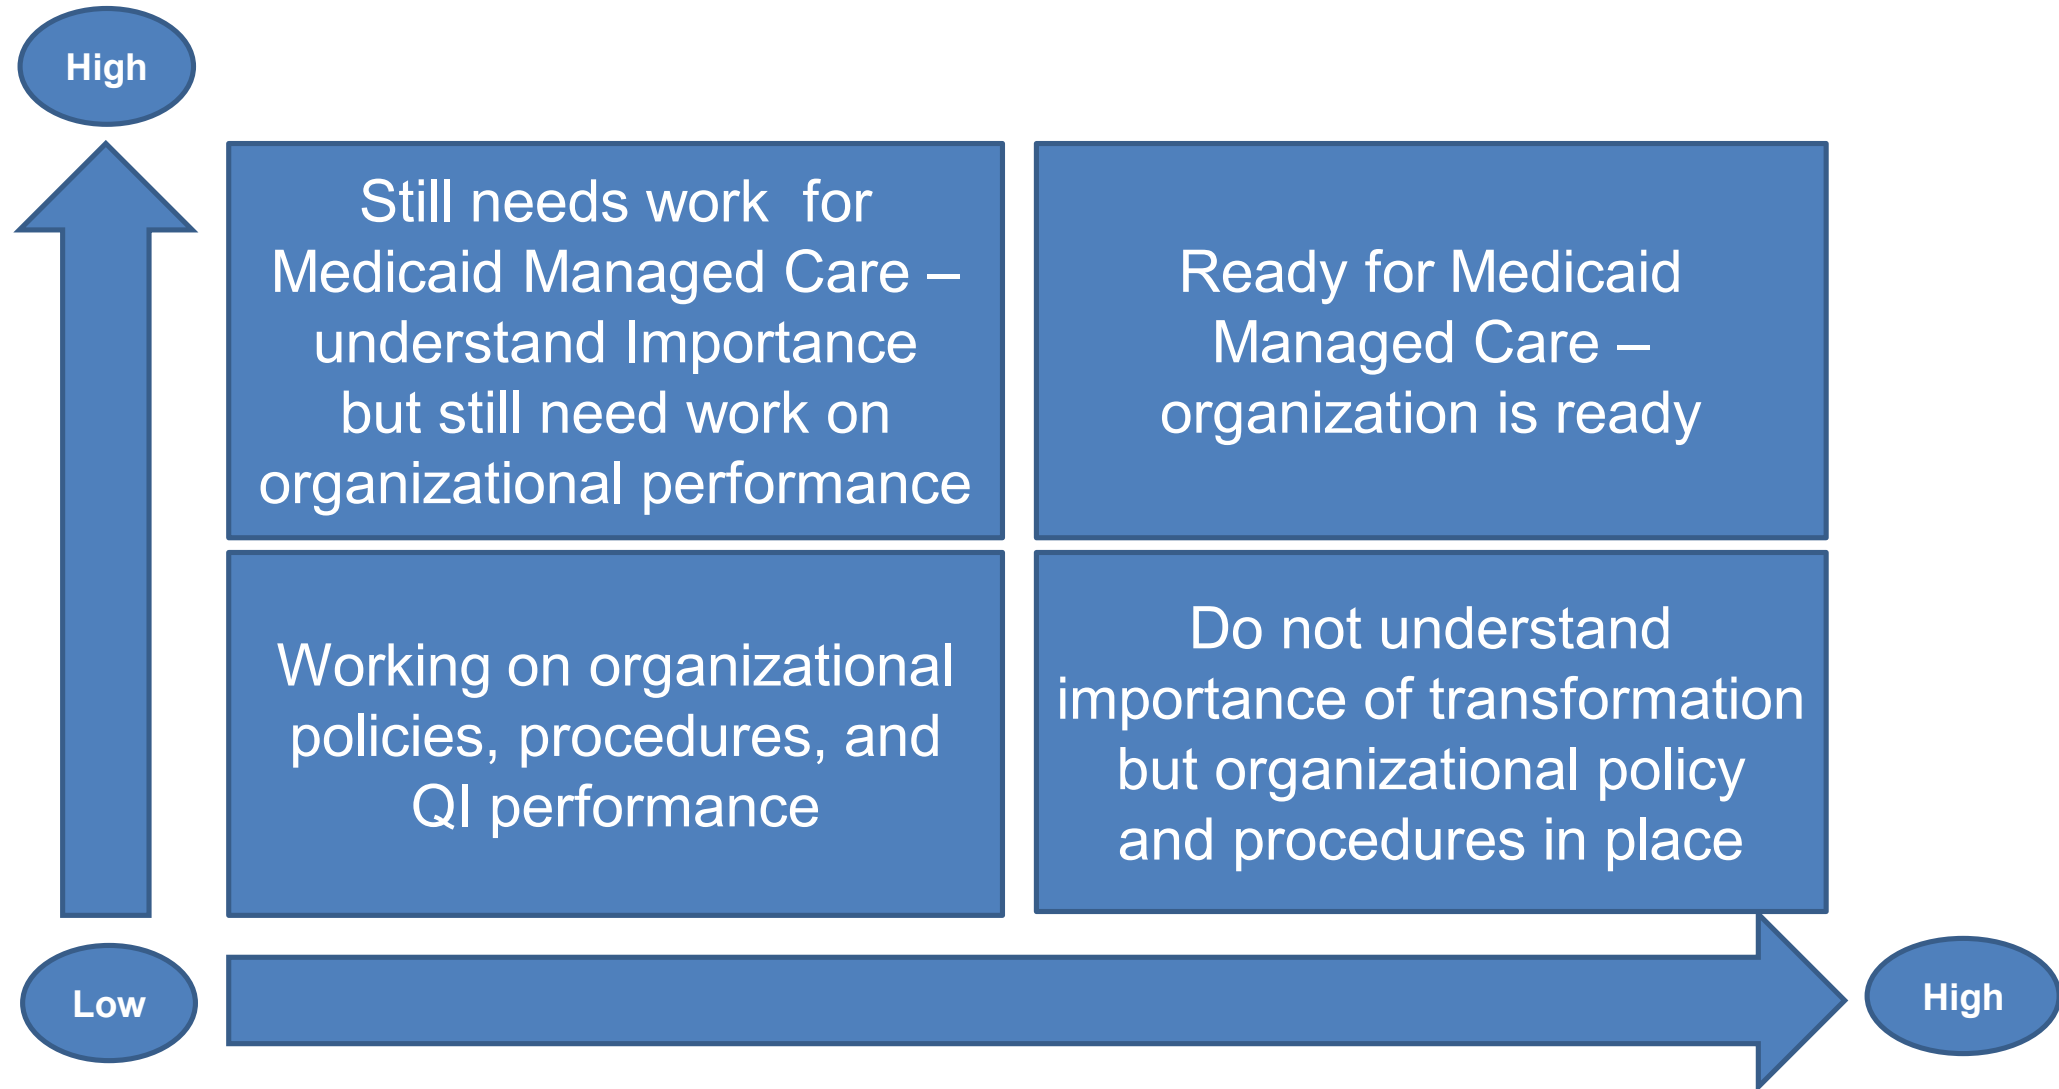

# How Alliance Will Enable Provider Practice Transformation

- Practice Transformation technical assistance
- Provide quality improvement tools and interventions
- Use of data platform
- Provide claims and pharmacy data
- Provide a project plan for transformation
