PROCEDURE CODE LOOKUP TOOL

THE TOOL TO DETERMINE:

- If you need a prior authorization
- To ensure that you submit that prior authorization in the right place

- Once you search for your code, the result will tell you if an authorization request is required, and where that request should be submitted.
- In this example, I searched code 22222, and Prior authorization IS REQUIRED. It specifies that the request will be submitted through WellCare, and I can “click here” to go to the WellCare Portal.
