NOTICE TO BIDDERS:

A. This Addendum shall be considered part of the documents for the above mentioned project as though it had been issued at the same time and incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original Architectural Design Development Documents, this Addendum shall govern and take precedence.

B. Bidders are hereby notified that they shall make any necessary adjustments in their estimates on account of this Addendum. It will be construed that each Bidder’s proposal is submitted with full knowledge of all modifications and supplemental data specified herein.

PART I – Items Pertaining to Written Clarifications and RFI’s

1. Question: Is there a spec for the 3M security film (there are several we can choose from) and/or for the one-way film?

   Response: Security film to be used is “3M Scotchshield Ultra Safety & Security Window Film”. One-way visibility film to be used is “3M Privacy Film”. While the product manufacturer does not offer cut sheets for these products, if you go to 3m.com you can find an authorized dealer through their website.

2. Reference: Please refer to keynote “229” on Sheet A2.12

   Question: Keynote 229 instructs the bidder to provide an add alternate price for a “Smooth Surface Barrier” between the generator and walkway and states that it must be ‘approved by owner’. Can the owner / architect please provide a detail / sketch of what is required? Based on the keynote alone, it is difficult to understand the owner’s expectation. What is a “smooth barrier”? What is the total length required? Is this a fence? A masonry wall with footing? Will gates or doors be required? Also, the current bid form does not list the associated alternate for this scope.
Response: Smooth surface barrier at police entrance is to be eliminated from the scope of Phase 1. Do not include in bid estimate.

PART II – Items Pertaining to Clarifications from Pre-Bid Meeting on 10/02

3. Question: Provide details on the concrete ramp expansion at the police entrance.

Response: Concrete ramp expansion is to be eliminated from the scope of Phase 1. Do not include in bid estimate.

4. Question: What is the total quantity of sprinkler fixtures that are to be replaced with institutional type fixtures?

Response: There are a total of 9 fixtures that are to be replaced.

5. Question: Provide product information for vision lite kits.

Response: Manufacturer – TruDoor
Product – Protect3 Fire-Rated Safety Wire Glass
Dimensions – 8” x 18”
Fire Rating – ¾ hr rating minimum

6. Question: Is a vision lite kit to be provided in the seclusion and restraint door?

Response: Yes, a vision lite kit is required at the seclusion and restraint door in addition to the doors previously specified in the drawings.

7. Question: Provide more detail for the scope of work to be done to the existing window in the seclusion and restraint room.

Response: Existing window dimensions are 3’-9” by 3’-7”. Install 1/2” think lexan over the existing glazing. Attach lexan to existing hollow metal frame with torx screws.

8. Question: It was determined during the mandatory pre-bid construction meeting that the existing carpet flooring at the police entrance and nurse station is to be replaced with plank floor. Provide product details for pricing.

Response: Manufacturer – Shaw Contract
Item – Style No. 0896V
Color – Spry 96250

9. Question: Provide a list of owner approved companies to perform asbestos testing.

Response: Asbestos testing has been eliminated from the scope of work. Do not include in bid estimate.
10. **Question**: Provide additional information regarding how the ceilings are to be treated in the police entrance, nurse station, corridor, and living room.

   **Response**: Replace existing ceiling tiles with Armstrong Ceiling Solutions 2767D Cortega Second Look II 15/16” Grid in white. Use heavy duty ceiling panel hold down clips at all locations.

11. **Question**: After demolition of the partition walls in the living room, how are existing electrical devices to be treated?

   **Response**: Disconnect and remove electrical device(s) which will interfere with the demolition and removal of walls as described in the architectural demolition plans. Remove existing circuitry (wiring) and conduit back to power source and disconnect.

12. **Question**: It was determined during the pre-bid construction meeting that the entire wing in phase one will be repainted. Provide paint finish.

   **Response**: All walls, ceilings, and hollow metal frames are to be painted in Dunn Edwards – Foggy Day – DE6226 - Flat. All bedrooms are to have one accent wall, opposite the restroom wall, in Dunn Edwards – Your Shadow – DE5921 – Flat.

**PART III – Additional Bid Submission Requirements**

13. As a separate attachment, the contractor shall provide a timeline that includes the complete schedule for completion of this project.

14. As a separate attachment, the contractor shall provide a list of relevant experience for at least three (3) but not more than five (5) companies where similar services to this project were provided using the format listed below:

<table>
<thead>
<tr>
<th>Name of Company</th>
<th>Address</th>
<th>Email</th>
<th>Telephone</th>
<th>Date of Service for this Project</th>
</tr>
</thead>
<tbody>
<tr>
