

*****Attention Medical Providers and Pharmacies*****

Important Information about the STOP Act for NC Medicaid & Health Choice Beneficiaries - Effective as of January 2, 2018

Due to decades of prescribing more opioids at higher doses, North Carolina is experiencing an opioid epidemic. From 1999 to 2016 more than 12,000 North Carolinians died from opioid-related overdoses. Three North Carolinians die from an opioid-related overdose every day. This epidemic is devastating families and communities. It is overwhelming medical providers and is straining prevention and treatment efforts. Modifying clinical coverage policies to promote safe opioid prescribing was identified as an essential and significant step to realize the vision of the North Carolina Opioid Action Plan ([https://files.nc.gov/ncdhhs/NC Opioid Action Plan 8-22-2017.pdf](https://files.nc.gov/ncdhhs/NC%20Opioid%20Action%20Plan%208-22-2017.pdf)) to reduce opioid deaths by 20 percent by 2021.

On August 27, 2017, N.C. Medicaid began requiring prior approval (PA) for opioid prescribed analgesic doses that exceed 120 mg of morphine equivalents per day; are greater than a 14-day supply of any opioid; or are non-preferred opioid products on the N.C. Medicaid Preferred Drug List. N.C. Medicaid worked closely with prescribing physicians and pharmacists to develop the best approach to reduce the oversupply of prescription opioids available for diversion and misuse, promote safe opioid prescribing for patients, and encourage alternative pain management, while minimizing administrative requirements as much as possible.

Effective January 2, 2018, clinical coverage criteria for opioid analgesics will be updated to comply with the quantity limits mandated by the Strengthen Opioid Misuse Prevention (STOP) Act, S.L. 2017-74 (<https://www.ncleg.net/Sessions/2017/Bills/House/PDF/H243v7.pdf>). **Prior approval will be required for short-acting opioids for greater than a five day supply for acute pain and seven day supply for post-operative acute pain. Prior approval will be required for long-acting opioids for greater than a seven day supply.** This is a change from current criteria which requires prior approvals for greater than a 14 day supply for long and short-acting opioid analgesics.

The prescribing provider may submit prior approval requests to NCTracks through the NCTracks portal or by fax. New opioid analgesic prior approval forms and revised clinical coverage criteria will be available on the NCTracks website. Beneficiaries with diagnosis of pain secondary to cancer will continue to be exempt from prior approval requirements.

The N.C. Department of Health and Human Services (DHHS) and N.C. Medicaid appreciate the partnership of prescribing physicians and pharmacists to combat the opioid crisis in North Carolina and to keep our fellow North Carolinians safe. Opioid safety and alternative pain management provider resources are available on the Medicaid Outpatient Pharmacy website (<https://dma.ncdhhs.gov/providers/programs-services/Prescription-drugs/Outpatient-Pharmacy-Services>) and the Community Care of North Carolina Medicaid Opioid Safety Resources website (<https://www.communitycarenc.org/nc-medicaid-opioid-safety-resources/>).

72-HOUR EMERGENCY SUPPLY

Reminder: Pharmacies may dispense an emergency 72-hour supply if a beneficiary is awaiting prior authorization.

PRIOR AUTHORIZATION REQUESTS

PA requests for opioids may only be submitted via fax or through the NCTracks Web Portal using your NCID and password (log in via <https://www.nctracks.nc.gov/ncmmisPortal/login>).

NCTRACKS PHARMACY CALL CENTER

Phone: 1-866-246-8505

Fax: 1-855-710-1969

Hours of Operation: Monday through Friday, 7:00AM to 11:00PM • Saturday and Sunday, 7:00AM to 6:00PM

Thank you for your support in serving our Medicaid and Health Choice communities!
