RE: ILI Funds for FY2020-2021

Date: January 11, 2021

I want to provide an update in reference to Alliance Health's ILI (Independent Living Initiative) Program. During this pandemic, Alliance Health has experienced an increase in the number of applications requesting assistance for individuals who are precariously housed, homeless or at-risk of becoming homeless. There are a number of federal assistance programs intended for COVID19 relief and we encourage you to access these and other housing resources for financial assistance that your member may be eligible for. If you need assistance with identifying housing and community resources, please contact your ILI Coordinator county representative.

While we have increased the amount of available ILI funding for the remainder of the year, we are having to make adjustments to our level of assistance to ensure there are sufficient funds for the remaining fiscal year and to help those in greatest need. Please review the following changes:

For individuals and/or families to be eligible for financial assistance through the ILI Program, they must be actively engaged in Enhanced Services which include:

- ACTT (Assertive Community Treatment Team)
- CST (Community Support Team)
- Care Coordination
- IHH (Intense In-Home)
- MST (Multi-Systemic Therapy)
- SAIOP (Substance Abuse Intense Outpatient)
- SACOT (Substance Abuse Comprehensive Outpatient Treatment)
- Psychosocial Rehabilitation
- Child PRTF
- Child Level Residential II and III
- Supportive Housing Case Management
- Intensive Case Management

Alliance understands the impact this may have on the individuals and families who are served by your agency. We also understand this will require more in-depth conversations regarding how households will sustain housing after the assistance period and utilizing other financial resources that are also in short supply. We are willing to consider extreme financial hardships so please reach out to your local ILI Coordinator for any case consultation or questions. Our goal is to ensure that we can assist as many households maintain their homes and provide opportunities to prevent or exit homelessness during the pandemic.
